

Light up your world!

Currently,

- The **majority** of schools in the U.S. **do not** offer Computer Science education - 55%
- **The benefits of coding for kids are expansive!**
 - Communication, collaboration, perseverance, problem-solving . . .
- **EdTech is a rapidly growing, multi-billion dollar industry**
 - ~252 Billion by 2025 [Forbes]

Our Big Idea

Create a way for kids to
click-to-code to
promote a positive
first-time hardware
engineering experience.

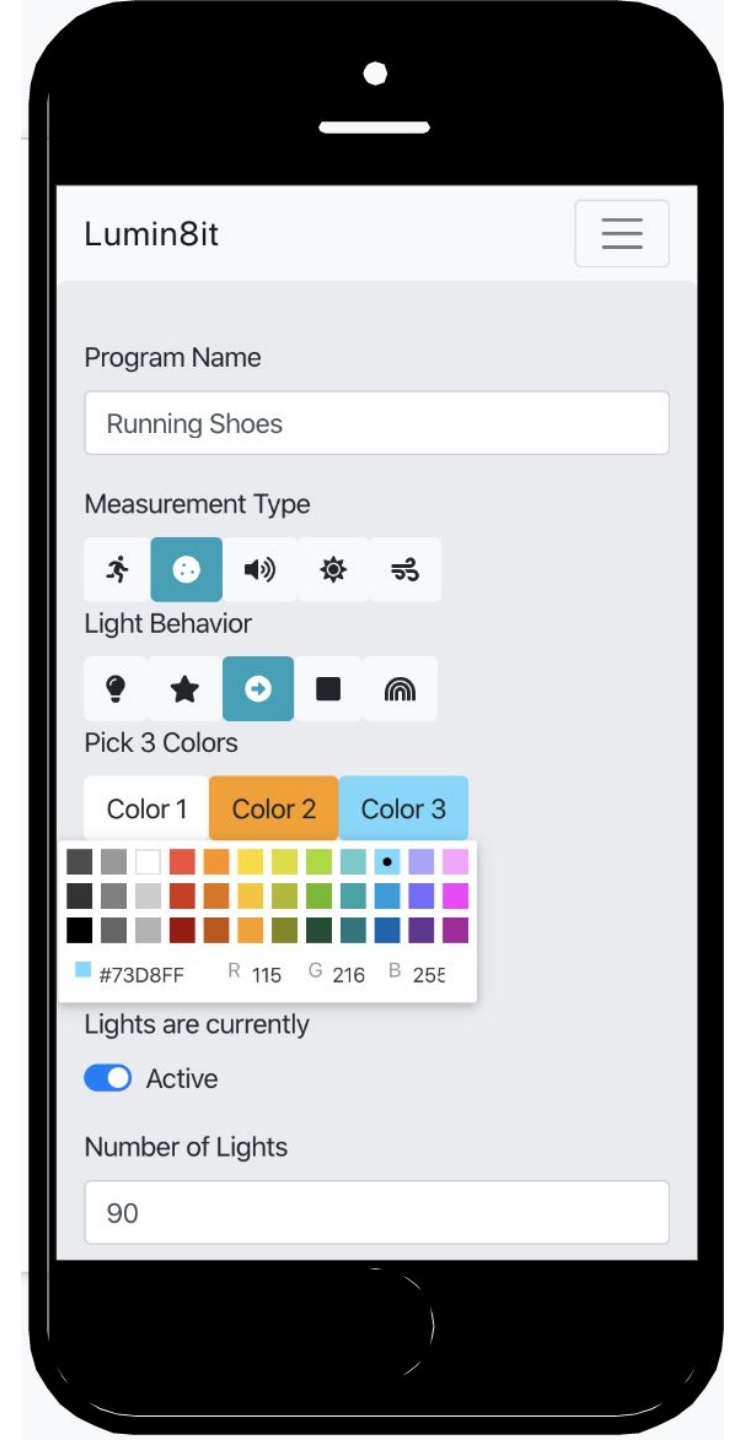

light up your world

- hardware build kit
- website to click to program
- hardware interprets programs retrieved via wifi

Built using React, Node.js, Arduino C++. Hosted on AWS Route 53, S3, API Gateway, Lambda, and DynamoDB.

Hardware doesn't need to be hard!

Thank you

to the organizers, sponsors, and
volunteers who make Technica 2019
possible!
